# Anaconda Navigator

Anaconda是一个集成各类Python工具的集成平台

# 包管理和环境管理工具：conda

高老师Python语言课程

# conda

conda: 一个工具，用于包管理和环境管理，其中：

包管理与pip类似，管理Python第三方库

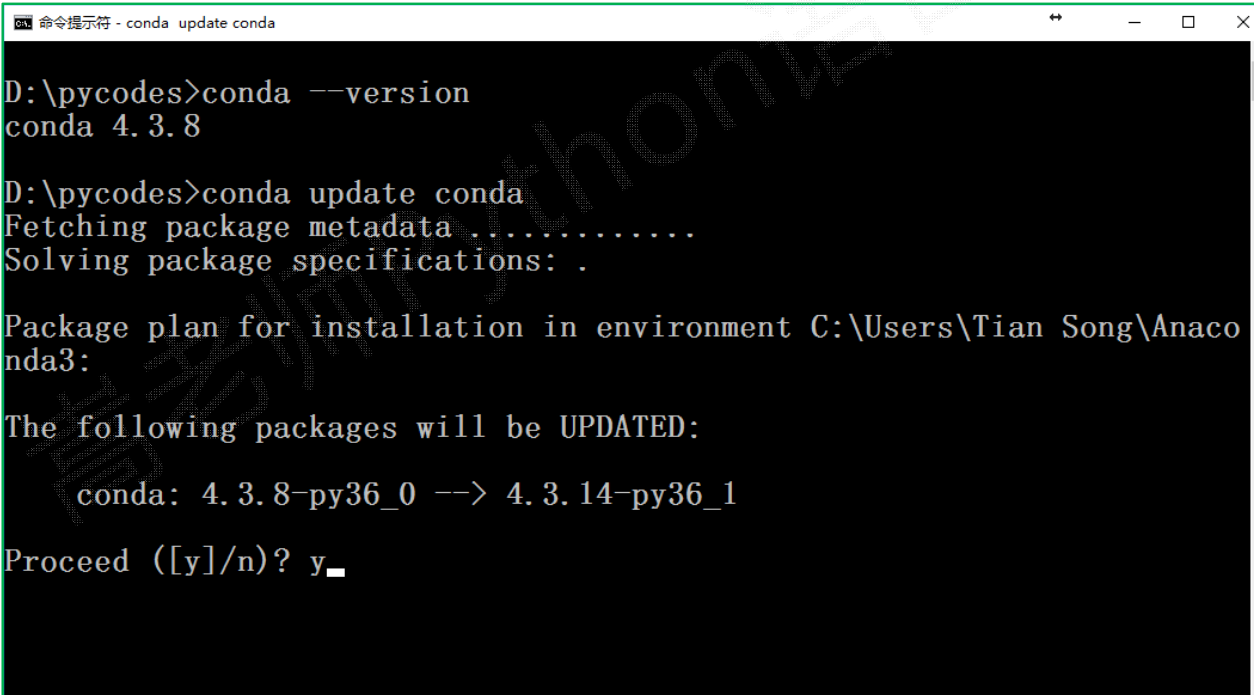

环境管理能够允许用户使用不同版本Python，并能灵活切换

anaconda：一个集合，包括conda、某版本Python、一批第三方库等

conda将工具、第三方库、Python版本、conda都当作包，同等对待

# conda

Win平台: cmd , 执行 `conda --version` 获取conda版本  
执行 `conda update conda` 升级conda

```
命令提示符 - conda update conda
D:\pycodes>conda --version
conda 4.3.8

D:\pycodes>conda update conda
Fetching package metadata .....
Solving package specifications: .

Package plan for installation in environment C:\Users\Tian Song\Anaconda3:

The following packages will be UPDATED:
  conda: 4.3.8-py36_0 --> 4.3.14-py36_1

```

# conda

The screenshot displays the Anaconda Navigator application window. The interface is divided into several sections:

- Header:** "ANACONDA NAVIGATOR" logo and a "Sign in to Anaconda Cloud" button.
- Left Sidebar:** Navigation menu with "Home", "Environments" (highlighted with an orange box), "Learning", and "Community". Below this are buttons for "Documentation", "Developer Blog", and "Feedback", and social media icons for Twitter, YouTube, and GitHub.
- Environment Selection:** A search bar "Search Environments" and a list of environments. The "root" environment is selected and highlighted with an orange box.
- Environment Actions:** A row of buttons: "Create" (highlighted with an orange box), "Clone", "Import", and "Remove".
- Package List:** A table showing installed packages for the "root" environment. The table has columns for Name, T, Description, and Version.

# Spyder

The image displays the Spyder Python IDE interface. The main editor window shows a Python script with the following code:

```
1 #-*- coding: utf-8 -*-
2 """
3 Spyder Editor
4
5 This is a temporary script file.
6 """
7
8 import matplotlib.pyplot as plt
9
10 plt.figure(1)
11 plt.subplot(211)
12 plt.plot([1,2,3])
13 plt.subplot(212)
14 plt.plot([4,5,6])
15
16 plt.figure(2)
17 plt.plot([4,5,6])
18 plt.figure(1)
```

The **Tools** menu is open, showing options: Preferences (Ctrl+Alt+Shift+P), PYTHONPATH manager, Current user environment variables..., and Reset Spyder to factory defaults. The **Preferences** dialog is also open, with the **Manage color schemes** tab selected. The **Scheme** dropdown is set to **Monokai**. The IPython console shows the following output:

```
File "<ipython-input-147-63629602a892>", line 1, in <module>
a.save("a.npy")
AttributeError: 'numpy.ndarray' object has no attribute 'save'
```

The IPython console also displays a list of coordinates:

```
[[40, 41],
 [42, 43],
 [44, 45],
 ...,
 [54, 55],
 [56, 57],
 [58, 59]],
 [[60, 61]]
```

The status bar at the bottom indicates: Python console | History log | IPython console | Permissions: RW | End-of-lines: CRLF | Encoding: UTF-8 | Line: 18 | Column: 14 | Memory: 71 %

An array object represents a multidimensional, homogeneous array of fixed-size items. An associated data-type object describes the format of each element in the array (its byte-order, how many bytes it occupies in memory, whether it is an integer, a floating point number, or something else, etc.)
